Panafax®
UF-9000

Panasonic ideas for life

It's a **network color scanner**, it's a **fax**, it's a

Welcome to the world of cutting-edge imaging technology. The Panafax® UF-9000 delivers more versatility, higher reliability, greater ease of use, and expanded network connectivity for your business.

The UF-9000 is a network-ready MFP with automated network installation capability.* Simply plug the cable into the UF-9000's Ethernet port and the network information is automatically acquired. *What more could you ask for?*

The UF-9000 allows users to scan virtually any type of document directly from the flatbed scanner, turn it into a PDF, custom name it, and send it to a networked PC.

The UF-9000's high-speed Super G3 fax with JBIG compression transmits at about 2.7 seconds per page. In addition to the diverse fax features, users will appreciate the UF-9000's email and internet capabilities, and the UF-9000 even *scans in color* taking your business to the next level of document processing.

The versatile UF-9000 sets the standard for network integration and provides the power of a big business office system in a single, compact, easy-to-use unit.

*Requires a DHCP server on the network.
