

WORKiO *Keystone of Your Document Infrastructure*

Featuring incredible networking capabilities and ease of operation, this high-performance platform offers versatile copying, network printing, and network scanning and distribution solutions for total document processing and management needs. With enhanced security functions, the DP-6030H gives you even more reasons to choose WORKiO for your *solution*.

WORKiO DP-6030H integrates total document workflow from digital copying, network printing and network scanning to fax and email distribution in a single space-saving console. Ready to connect BT/F29 1
wo oeK-10mt-10(K-10n)-10at1teso octext-10(K-10(t)1wo)6(o)6(and(giv)07(esnew meaning t)6(o)9D227(u

WORKiO – the Copying Solution

high-speed Ledger-class copying

From routine copying of notes for a small audience, to the production of bound multi-page reports for an entire department, the WORKiO DP-6030H can handle everything from the easiest job to the most complex high-volume job at a speed of up to 60 Letter-size copies per minute. Responding to the demand for large-size document copying, Ledger-size paper handling is standard.

capacity that grows with your needs

The WORKiO DP-6030H is ready to meet the needs of most high-volume work environments. The standard capacity of 2,150 sheets is attained with a 1,550-sheet large-capacity tray, a 550-sheet paper tray and a 50-sheet bypass tray. However, if more capacity is required, the addition of two optional 550-sheet trays and a 3,000-sheet cassette can raise the capacity to a maximum 6,250 sheets.

Meet the Friendliest Face in the Office

Designed to let even a first-time user take full advantage of the many digital copying conveniences, the WORKiO DP-6030H GUI sets a new standard in ease of operation. The left-to-right menu arrangement follows the natural flow of work and takes the complexity out of setting the most challenging copy jobs. The spacious layout of the large touch-screen panel displays the settings with easy-to-understand graphics to speed identification and selection.

Simple, easy to follow steps for Booklet Making

Step 1:

Setting naturally begins with the left tab "Basic" menu. Select "Proof Set" to obtain one sample set to check all job settings before committing to a mass copying job. You can choose to be notified when the job is done by pressing the "Completion Notice" button on the bottom left of the screen.

Step 2:

The next tab "2-sided/orig.->copy" offers a variety of choices that use the built-in duplex unit. Each is represented by text and easy-to-understand graphics, choose "Booklet".

Step 3:

The "Job Setting" summary function is visible on the right side of the interface and it lets the user confirm settings and easily go back to make changes. As soon as the job starts, the user can return to their desk and take care of other business until the WORKiO DP-6030H sends a job completion notice directly to their desktop.

innovative interface

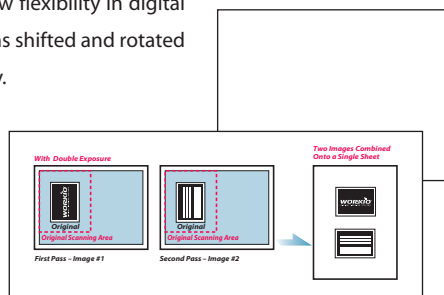

Engineered from the ground up for ease of use, this platform also saves time in job setting through an innovative and friendly GUI. The intuitive tabbed interface on the extra-large half-VGA LCD display (640 x 240 pixels) provides users quick access to basic copying functions and leads the user through advanced settings such as image rotation and finishing options. Prior to the job execution, a graphical confirmation of the original versus the final job setting is provided, which helps to prevent costly copying errors. While the WORKiO DP-6030H is completing a large-volume job, the user can attend to other priorities and a completion notice will be sent directly to their PC when their copy job is finished.

versatility and convenience

In digital copying versatility, the WORKiO DP-6030H is unsurpassed with features like a built-in duplex unit and high-speed automatic document feeder. Conveniences like Double Exposure, Digital SkyShot, N-in-1 Copy, Zoom and Image Rotation introduce users to new flexibility in digital copying, while Sort Copy electronically collates copies as shifted and rotated sets, saving valuable time, while increasing productivity.

Double Exposure WORKiO Original

By selecting the Double Exposure key located on the control panel, users can make quality copies of double-sided documents on a single sheet of paper without the black borders, even if the platen cover is open. This is especially convenient for copying small double-sided originals such as ID and insurance cards, checks, and receipts.

N-in-1 copy

Using the easy-to-understand interface, copying multiple originals on a single sheet is very simple and accelerates document production while saving paper.

Zoom Copy

Featuring easy automatic presets and manual control in 1% steps, WORKiO DP-6030H makes enlargement and reduction of copies easy, fast and flexible.

The DP-6030H's optional 40GB HDD provides these additional functions:

- *Concurrent Copy up to 12 Copy Jobs*
- *Tandem Copy – Copy the same job on 2 DP-6030H's (that's effectively 120 ppm!)*
- *Remote Copy – Send your copy job to another WORKiO*
- *Security Print – Password protect documents so they don't print until you are at the machine*
- *Mailbox Print – Send many jobs to the WORKiO and print them when you get there*
- *Print Spooling – Takes many jobs in freeing up your workstation faster*
- *Job Building up to 750-pages per copied set capability*
- *Job Building up to 999-pages per scanned set capability with optional Network Scanning*
- *Up to 1000 One-Touch Address with Fax or Internet Fax option*
- *Accounting Software option compatibility*
- *PostScript resident font storage with PostScript option*

double-side copying for double savings

Built-in duplex unit enables copying on both sides of each sheet for higher productivity and economy. Used in combination with the Automatic Document Feeder, users can exploit the advantages of high-speed automatic duplex copying.

high-quality image reproduction

Speed never comes at the expense of quality with WORKiO. Newly developed LSIs, ultra-fine toner/carrier particles and image stabilizing technology ensure 600 x 600 dpi resolution and 256-level gray scale to produce copies with high legibility and clear sharp images at high speed across multiple generations.

Image Enhancement Technology

A picture is worth a thousand words and the WORKiO DP-6030H makes sure the image quality delivers full value by faithfully copying every graphic nuance and the smallest text in clear detail.

network-enhanced functionality

Connectivity may not seem important in copy mode until you explore how the inherent networkability of the WORKiO DP-6030H enables enhanced capabilities such as **Tandem Copy***, **Remote Copy*** and even copy job completion notices.

Tandem Copy*

For extra-large jobs with tight deadlines, Tandem Copy lets you harness the power of multiple WORKiO platforms to work jointly on a single job.

Remote Copy*

With remote copy, a copy job can be sent to another networked WORKiO platform on another floor or in a different department.

Finishing the Job

Select sorting/finishing options and pick up your collated sets of copies. With optional finishing modules, sets are automatically stapled or saddle-stitched or hole-punched for ring binding.

* Tandem/Remote Copy functions are applicable only between the DP-6030H/4530H/3530 and other DP-6030H/4530H/3530/6020H/4520H/3520/6010/4510/3510

complete from start to finish

The final step of manually "finishing" copies as stapled or bound sets is very time-consuming. The addition of the optional stapling, punching and saddle-stitching finishing modules automates this process and makes your WORKiO DP-6030H a complete document solution from start to finish. Always visible on the right side of the interface, the Job Setting window provides an easy-to-see, easy-to-navigate graphical list of all user settings, enabling confirmation of "finish" or any other settings beforehand.

Up to 60-ppm network printing plus Ledger-output capability

leveraging your network with connectivity

WORKiO is about sharing networked resources and multiplying their effectiveness. With the standard 10Base-T/100Base-TX Ethernet interface, the DP-6030H immediately enables all networked PCs to access the power and capacity of network printing from the desktop. A parallel interface is also included for direct connection to a dedicated PC.

True 600 x 600 dpi resolution is more than enough image quality for professional-quality documents. However, the DP-6030H raises the bar with Panasonic's Image Enhancement Technology and produces quality equivalent up to 1200 dpi for even smoother gradations, sharper details, and superb photos and graphics. Small text is easily legible even against background graphics. In addition to standard Windows GDI printing, the WORKiO DP-6030H offers optional modules and drivers to expand printing versatility with applications.

behind speed and quality

improving images pixel by pixel

Panasonic's Image Enhancement Technology makes a visible difference in every print. By producing images with the equivalent of twice the number of dots per inch of a 600 dpi printer, WORKiO DP-6030H gives documents smoother curves, diagonals and banding-free gradations.

Step 2:

Step 3: After sending the job to the printer, the DP-6030H sends a Completion Notice to the user notifying them that their job is finished, eliminating wasted trips to check the machines status especially when the print job queue is full.

WORKiO – the Scanning & Document Di

The WORKiO DP-6030H is also a high-speed scanning solution. Equipped with an inverting ADF unit (70-page capacity), it can automatically perform double-side scanning of documents as large as ledger size. Thanks to the high-resolution scanning at 600 x 600 dpi with 256 levels of grayscale, scanned documents can be printed later at quality compatible to the original document. And, with our Job Build and SADF mode, users can sequentially scan up to 999 pages per document*.

* Requires optional hard disk driver.

Multi-protocol, Multi-network design

Broad OS compatibility ensures that LAN clients using Windows XP/2000/98/Me and even Windows NT take advantage of the versatile "Push-type" network scanning capability.

WORKiO not only gets documents into the digital flow faster with its high-speed scanning, it also provides [Document Manager software](#) for efficient management, editing and sharing of scanned documents. For very large-scale document management based on a client-server model, the optional [DD Server System](#) takes your business another step closer towards realizing paperless document management is possible.

Scanned Document Management

When a scanned document arrives, Document Manager notifies the user and automatically opens it. Image Viewer enables the user to easily view, annotate or attach memos to the file. With simple "drag and drop" operation, users can manage and edit documents right from their desktop, and even share them with other PCs.

istribution Solution

Document Distribution System*

One-Touch Document Routing

WORKiO's Address Book allows registration of up to 1,000* addresses, Fax numbers and email addresses. In addition, network addresses can be registered easily by using the "soft" keyboard, and a handy utility supports easy creation of standardized email headers.

* Requires optional hard disk driver.

Document Distribution System (DDS)

DDS is a powerful tool that lets users create distribution jobs and routing menus for fast, precisely targeted, automatic distribution. Once workflow routines have been defined, DDS will automatically route and distribute scanned documents, inbound faxes and internet faxes, greatly simplifying repetitive distribution tasks. The routing menus in the WORKiO control panel are easy to understand and navigate. DDS also offers versatile image processing, including auto rotation, skew correction, noise reduction, automatic or manual file naming and OCR text extraction allowing the creation of text searchable PDF files. In addition, users can store and view documents in secure Web folders, with sensitive information archived by sender, recipient, inbound routing and inbound address.

fast faxing

Transform the WORKiO DP-6030H into a high-performance fax station, with the optional fax communication kit, which adds fast 33.6 kbps Super G3 fax with JBIG compression capability accelerated by 0.7-sec "Quick Scanning" for shorter prep time and Quick Memory Transmission. High 600 x 600 dpi communication resolution preserves the high scanning resolution of WORKiO for accurate reproduction at the destination. One of the smart features of the DP-6030H is a function that automatically switches to fax mode by determining that a telephone number is being entered when a number over 6 digits is entered.

internet faxing

With the Internet Fax / Email option, the DP-6030H can be set up to scan documents as TIFF images or PDF files allowing the user to transmit them as email attachments. For example, with the "Scan-to-Email" feature, scanned documents can be directly sent from the WORKiO DP-6030H to other Internet Fax-capable platforms or even multiple email clients anywhere in the world. Simultaneous distribution of the same document to multiple email clients and G3 fax terminals is easy using the "Mixed Broadcast" feature and convenient fax/email utilities like the WORKiO Address Book. Editor allows you to easily enter up to 1,000* addresses.

gateway to "paperless" productivity

WORKiO's Internet Fax / Email option also provides the platform with a fax / email gateway function. Incoming faxes can be automatically routed to the designated recipient's email inbox where the attached image file can be easily opened and viewed with a standard image viewer such as "Imaging for Windows." The optional fax communication kit and Panafax Desktop software allows users to send documents directly from their PC via the LAN and WORKiO gateway to G3 fax machines around the world.

Panafax Desktop Software

PC Fax lets users send documents from their PCs directly to fax machines, eliminating the step of printing a hard copy and then running it through the fax machine. The PC Fax capability can save valuable time, labor, and paper.

WORKiO – the Reliable Solution

multi-level security

hard disk data erasing* – A welcome security function that erases data on a hard disk by overwriting it with zero data or random numbers. It can also erase all hard disk data when the unit is discarded. This prevents the leakage of information and eliminates worries about data that would otherwise be left on hard disks.

* Option

mailbox – Users can send print jobs to be stored in the WORKiO mailbox. Then whenever they want to print them, for example, at a later time to keep them from being output together with other people's jobs, the DP-6030H will print them all at once.

secure mailbox – Sensitive "eyes only" documents can be temporarily stored in the secure mailbox. Users enter their passwords to safely print out the documents at any time they choose.

* These functions require the optional hard disk unit.

the solution you can depend on

Reliability has always been WORKiO's number one priority, especially in the case of a multifunction digital hub because downtime can be very costly. Every aspect of the WORKiO DP-6030H, from its extra rugged chassis and high-reliability copier/ printer engine, to the long service life of the drum and other periodically replaced parts, is engineered to last.

service-friendly

The **full front-access design** of the WORKiO DP-6030H reduces time required for a wide range of servicing tasks from routine toner replacement to the occasional clearing of misfeeds. This is just one of the many engineering improvements that make the care and maintenance of this platform easier.

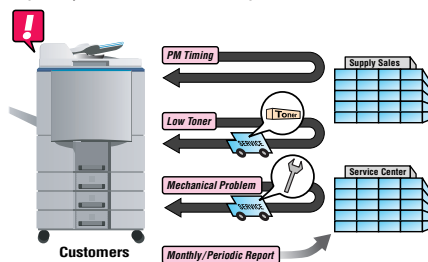

Remote Maintenance System

"Check & Call" can prevent costly downtime caused by issues that sometimes get over looked such as running out of toner or by providing an early warning notice regarding mechanical failures by automatically reporting the machines status directly to a service center. Our remote maintenance system is also supported by a **Remote Diagnostic System** that can take advantage of the WORKiO DP-6030H's connectivity via a telephone line or via the internet. This feature enables technicians to quickly trouble shoot and provide solutions.

"Check & Call"

To prevent interruptions in productivity, our convenient "Check and Call" system enables service centers to stay on top of your printers status and performance. For example, the built-in automatic report function lets us know when toner is running low or if mechanical failures require attention.

network accounting software

The optional Network Accounting Software can collect and tabulate log information data such as number of prints, copies and faxes that have accumulated in the DP-6030H. This is useful for obtaining data from a variety of perspectives: analysis and period totals for each job or output tabulations by department and user.

environmentally friendly

The environmentally friendly design is not just good corporate citizenship, it also makes good business sense. The Energy Star-compliant WORKiO DP-6030H contributes to lower TCO because it uses very little energy and significantly reduces power when in idle mode. In sleep mode, energy needs drop to virtually nothing and the work environment is also quieter and cleaner thanks to reduced noise and ozone emissions.

Enhanced hard disk erasing

WORKiO gives you choices, letting the user decide on how securely they want their data to be kept, or deleted.

Service Friendly

Full-front access is one of the distinctive design features of WORKiO's "service-friendly" concept.

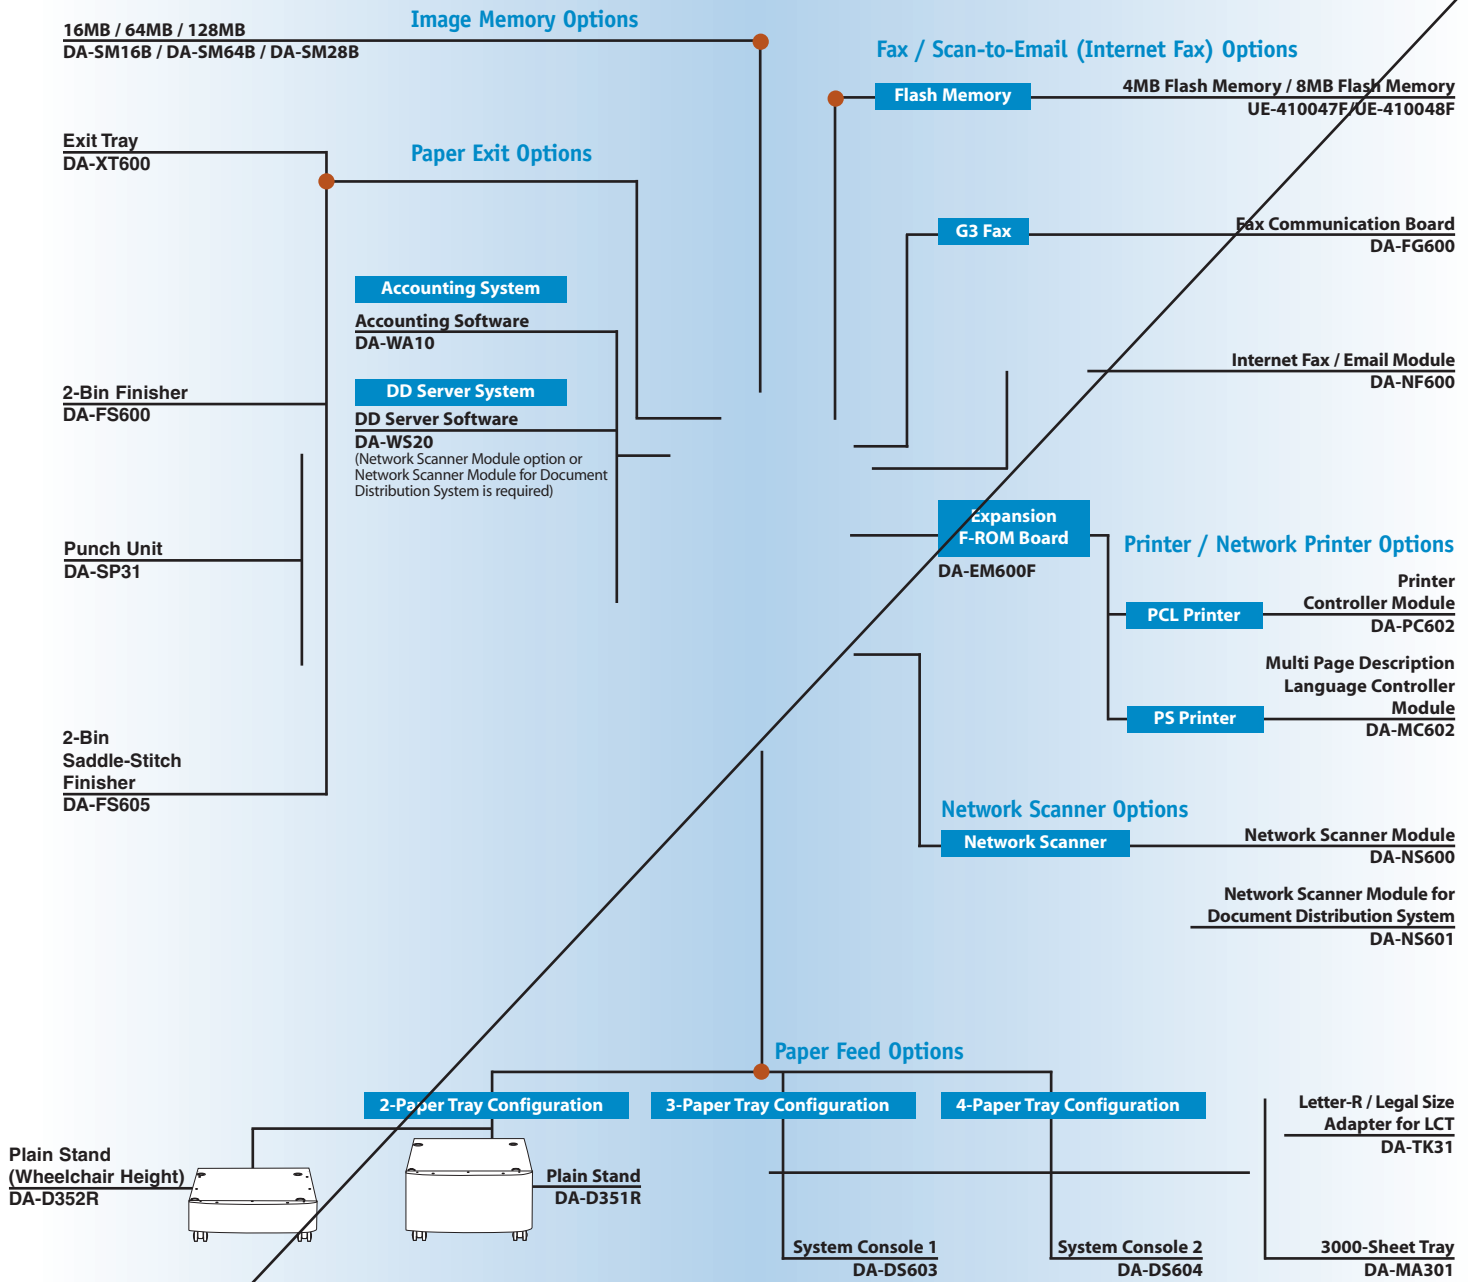

Changing the toner bottle is as easy as opening the front panel door.

The toner bottle swings out of the way and the entire printer engine slides out for easy access. Servicing core components and addressing mechanical failures has never been easier.
